BOX

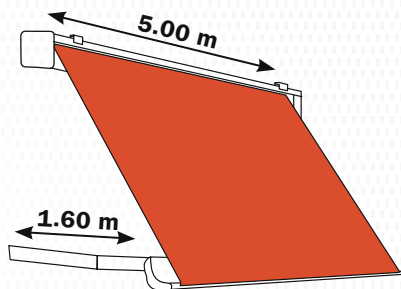

Description

This is a self-protecting awning whose structure makes it ideal for installation on windows.

Ideal for installation

- On windows
- On small terraces

Dimensions

Mounting

- Wall
- Ceiling
- Between walls

Tension transmission system

This system has PRT-07 arms which feature an internal tension transmission system using the ART SYSTEM's flat and flexible tape to considerably extend the lifespan of the awning.

The system is especially designed to reduce tension as the fabric is rolled up in order to prevent subjecting the fabric or the brackets to unnecessary force when the fabric is retracted.

Operation

- Manual
- Motorised
- Automated

Finishes

- Lacquer in accordance with QUALICOAT standards

- Stainless steel screws and bolts

European standard classification: Class 2

Technical specifications

Dimensions (mm)	
Wall	Ceiling

Roller tube capacity	
With ø70 tube	3.00 m

Degree of inclination	
Wall mounting	Ceiling mounting

Maximum width according to maximum projection		
ø Rolling tube	Maximum width	Maximum projection
ø 50	3.00 m	3.00 m
ø 60	4.00 m	3.00 m
ø 70	5.00 m	3.00 m

Features:

- Self-protecting system helps keep the fabric in perfect condition.
- An elegant and functional structure designed to perfectly integrate the awning with the façade it is mounted on.
