STORBOX-400: R-Evolution

Since 1993 the STORBOX cassette awning has been constantly evolving to set new trends. STORBOX-400 revolutionises the range with its aesthetic full of strength and vitality, with its greater projection capacity of up to 4 metres and with the addition of lighting in the arms and front profile. Its slope adjustment system, with the awning closed, is fast and accurate, guaranteeing an impeccable result. Whether motorised or manual, STORBOX is gaining new momentum to remain the pioneer top-of-mind cassette awning.

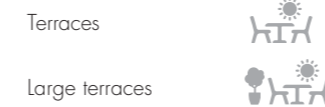

Compatible with arms:

ONYX AND ONYX LUX

Its tensioning system does not erode the enamel coating and provides more strength and durability than a cable or chain system. Completely integrated lighting without visible cords or cables.

Usual installations

Finishes

Lacquer in accordance with QUALICOAT standards
Stainless steel screws and bolts
Arms with integral laquering

Classification

 Wind
Up to 28 km/h

 Durability
10000
maneuvers min.

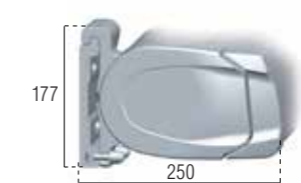

Norm:
UNE-EN 13561:2015

STORBOX-400 highlights:

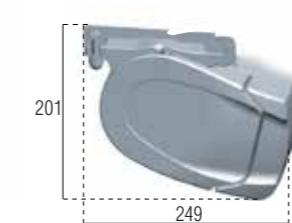

- Large dimensions: 6 m of width by 4 m of projection.
- Flexible design with top-of-the-line, 100% metallic finishes.
- Capacity for lighting built in to the front profile and arms.
- Slope adjustment with the awning closed.
