STORBOX SQ-400

STORBOX SQ-400

(actual dimensions)

The awning that fits perfect shapes

Beyond its apparent austerity, square shapes act as windows to transcendental simplicity, reminding us that beauty can be found in the elegance of minimalism.

In every right angle, in every corner, there is an argument in favour of beauty in uniformity and serenity in structure.

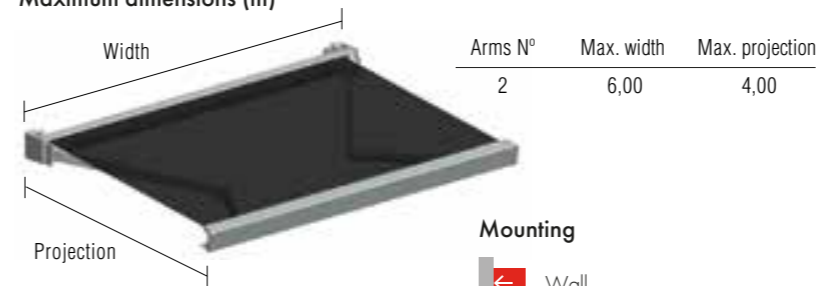

The LLAZA STORBOX SQ-400 cassette awning, with its entirely metallic finishes, brings the elegance of colour and texture uniformity.

With motorized operation, it adapts to front and ceiling installations, offering a wide range of inclination.

The slope adjustment system is fast and precise, requiring minimal opening of the awning for its execution. The result is spectacular. The STORBOX SQ-400 reaches maximum dimensions of 6 meters in width by 4 meters in projection without losing the harmonious proportions conferred by its straight and essential forms.

Maximum dimensions (m)
